Timberweld® *Versus* Mechanical Joints

https://cwgchoices.com/timberweld2

'Choices' Residence Collection

The 'Choices' Residence Collection are all available Timberwelded.

By combining the timeless aesthetics of the Residence Collection with the flawless craftsmanship of Timberweld®, homeowners can enjoy the authentic charm of traditional timber windows without any visible welds.

Residence 9 | Residence 7 | Residence 2 | Residence Doors

Timberweld®

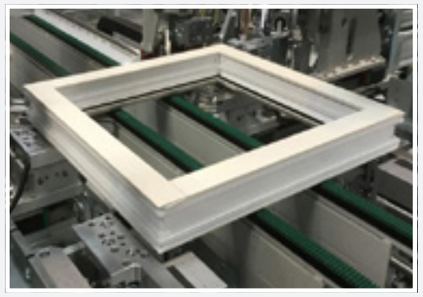
Choices

Perfectly sealed, authentic looking timber joints

Bid farewell to mechanical joints and embrace the impeccable artistry of Timberweld® while maintaining top-notch performance and aesthetics.

This innovative, patented technique delivers authentic timber joints that grace both the Sash and Frame.

The process produces premium finished products that closely resemble the traditional charm of timber joints on the entire "Residence Collection" from CWG.

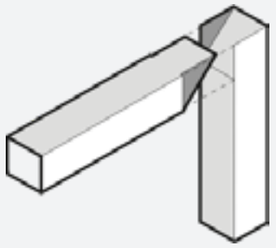


The Timberweld® Process

Experience the future of PVCU joinery with Timberweld®, an innovative process that creates flawless, seamless joints, evoking the classic appeal of timber windows.

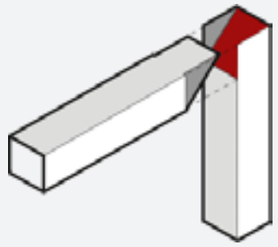
Patented technology ensures premium aesthetics, superior performance, and timeless elegance in every product.

Step 1



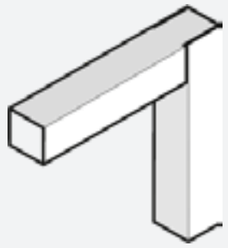
TIMBERWELD® is unique and patented method of joining two sections.

Step 2



Profiles are cut to size, then ends milled before being welded or joined.

Step 3



No holes, just perfectly sealed corners.

- ✓ 1.4 U Value (1.2 achievable)
- ✓ 24mm Softcoat sealed units
- ✓ Equal Glass height as standard
- ✓ Internally beaded
- ✓ ERA Hardware
- ✓ Deep Authentic bottom rail
- ✓ Superior Spiral Balances
- ✓ Quick release sashes for ease of installation
- ✓ Fully Steel Reinforced Frames

RunThru Horns

Choose from three functional options, including designs that meet the requirements of Part B of Building Regulations for fire escape.

RunThru Horn top hung over fixed pane

Top hung windows with horns, create an attractive alternative to the traditional vertical sliding window.

Whilst this is the slimmest and most cost effective RunThru horn option, it does not meet the requirements of Part B of Building Regulations. In this instance Option 2 or 3 should be considered.

RunThru Horn over Tilt and Turn inwards opening window

The Upper Sash - The top hung casement provides a convenient and ready source of ventilation. It can also be locked in a night ventilation position.

The Lower Sash - The lower sash is a Tilt and Turn window and as such can be tilted inwards for ventilation. It can also be turned 90° inwards for cleaning. Dependent upon size and position it can be used for emergency escape when the opening size must meet the demands of Part B of Building Regulations.

Min 450mm in either direction. Min 0.33m²

The full Tilt and Turn with Dummy Sash and RunThru horns

A window designed specifically for a home owner who requires the top opener over a fixed pane style, but has to consider Part B of Building Regulations.

To match a top hung over fixed pane style window, a full Tilt & Turn sash is fitted with a fixed dummy sash with RunThru horns. The result is a fully opening window that has ventilation under normal circumstances and the escape facility if the worst should happen.

Tilt and Turn width/height ratio = Width should not exceed 1.5 times height

RunThru Horns

Choices

RunThru windows create a practical alternative to the traditional vertical sliding window.

RunThru horn windows are available in a range of styles and in particular, can provide egress solutions where required.

RunThru horns in Kömmerling O70 and C70

Standard Specification:

- ✓ 70mm frame depth
- ✓ 'A' Energy Rated
- ✓ Available triple glazed
- ✓ 5 chambered for enhanced thermal performance
- ✓ Wide range of foils
- ✓ U-value of 1.4W/m²k, 1.2 with Low-E plus glass

works with Kubu®

Be Sure You're Secure, with Intelligent Security Alerts.

Only from Kubu.

Did you know over 90% of alarm triggers in the UK are false alarms†?

Alarm Blindness is setting in – people are more likely to think 'Shut up!' than wonder what's up...

Kubu offers a smarter, more personal solution – providing accurate, timely and meaningful alerts like never before.

It's an **intelligent alerting system** that integrates directly with your locks, giving real-time security updates, directly to your pocket.

Key Features

† Source: Origin Wireless AI: False Alarms in Security Systems - 08/08/23

SureShield™

Enhance your home security with real-time critical notifications that overide 'Do Not Disturb' for any attack, tampering or security threats.

Geofence Alerts

Never forget to secure your home again. Kubu will send you an alert if you've forgotten to lock up, before you get too far from home.

Perimeter Security

Secure every opening around the entire perimeter of your property, with Kubu's range of smart security sensors.

Family Sharing

Keep loved ones connected by letting them check your security status via the app, offering shared peace of mind wherever they are.

Scheduled Alerts

Scheduled alerts make life easier—like a bedtime reminder of the status of your doors and windows, ensuring your home is secure while you rest peacefully.

Smart Integration

Turn off the heating when you open a window; Ask Alexa if your home is secure; or even sound the alarm. Kubu integrates with most smart home devices.

Award winning smart security:

BEST NEW PRODUCT '23 · BEST COMPONENT SUPPLIER '23 · BEST WINDOW COMPONENT '23 · BEST DOOR COMPONENT '23 · BEST MARKETING SUPPORT '22

Intelligent Sensors

- Physical and technological security combined
- Detects a breach before it even happens
- Reports open, closed, locked AND vent modes
- Tamper protection built in
- Completely concealed
- Calibration FREE

Intelligent Controls

- Fully *Smart Home* integrated
- Works with most major smart-tech brands
- Controlled with the Kubu® smart phone app
- Uses AI/machine learning
- Can activate automations by turning a key, or opening a window...

ULTION 3 Cylinder upgrade

Features and Benefits

- ✓ Eleven Pin Locking
- ✓ 294,970 Lock Combinations
- ✓ 100,000 Cycle Endurance Test
- ✓ Snap Tested Resistant Sections
- ✓ Drilling, Pick and Bump Tested
- ✓ Molybdenum Alloy Core
- ✓ Available on any new 'Choices' door
- ✓ All Locks can have the same key
- ✓ Single, Double, Sliding and Bi Folding
- ✓ Retro Fit into existing doors

Ultion Plus cylinders are available to fit to any new 'Choices' single,double or bi-fold door and can be retrofitted to existing 'Choices' doors

The basis of the high security is the Molybdenum Alloy Core (Centre section) which as soon as the lock comes under attack, goes into 'Lockdown Mode'. The first two sections are designed to 'snap' off – then the attacker will be confronted with the high security 'core'.

Please note Ultion Plus cylinders are only supplied with 3 keys per set, so additional keys may be required when ordering keyed alike cylinders as part of a set

Panic Bars to BS:EN 14351 upgrade

Multi-point panic bar door lock with optional external access suitable for Single or Double doors. Double doors can be supplied offset to give maximum width for Master door.

PVCU doors are not recommended for high commercial usage

External access option requires key for entry from outside

Double doors supplied with panic bar to master door only, slave leaf operated by GZR finger operated bolt

Inotherm

Choices

Inotherm aluminium doors are the crème de la crème of entrances and one of the most sought-after range of doors in Europe.

EXCLUSIV Aluminium Entrance Doors

1 Above-standard profile thicknesses
Due to their above-standard thickness, all entrance doors provide you with outstanding thermal insulation and high energy savings.

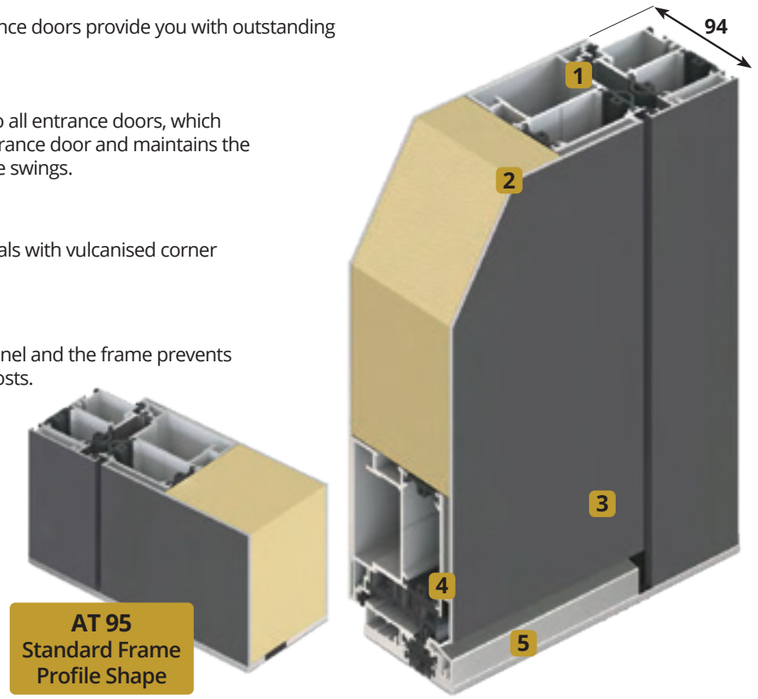
2 Anti-bending expansion layer
For better statics, an expansion layer is added to all entrance doors, which prevents the bending or deformation of the entrance door and maintains the stability of the door even with large temperature swings.

3 Additional seals
Our doors are sealed with three round liquid seals with vulcanised corner joints for better thermal insulation.

4 Thermal bridge interruption
A special heat barrier in the gap between the panel and the frame prevents heat from escaping and reduces your heating costs.

5 Aluminium threshold
A robust aluminium threshold with a thermal break reduces the energy flow in the lower part of the door and allows for the invisible mounting of the door frame.

Triple Glazing
All entrance doors feature glazing with three 6mm thick glass panes, which additionally insulate and enhance the safety of your home.



Inotherm Features:

- ✓ "Design Your Own Door" feature available
- ✓ Single doors up to 1260mm wide x 2700mm high
- ✓ Schuco patented profile
- ✓ 0.7W/m²k - 0.9W/m²k 'U' value range

Alu Clad 'Choices' Timber

Flush Casement / Fully Reversible Windows

Outward opening flush casement windows with clean, straight edged timber frames and external aluminium cladding for a low maintenance solution. As an outward opening casement window, the functionality also allows for fully reversible for easy maintenance and cleaning.

The internal timber is, as standard, square edged (Softline) however it is also available with a slightly moulded, decorative finish (Classic).

Specification

- ✓ Engineered (laminated) timber profiles
- ✓ Pine timber with external aluminium cladding
- ✓ Factory applied paint / clear on white tone lacquer
- ✓ Polyester Powder Coated (PPC) aluminium
- ✓ Casement and reversible hinges
- ✓ All multi-point locking
- ✓ Modern square profile - Softline
- ✓ Traditional moulded profile - Classic
- ✓ Factory fitted double or triple glazing
- ✓ Double glazed with overall U-value of approx 1.34W/m²K
- ✓ Triple glazed with overall U-value of approx 0.92W/m²K
- ✓ Externally beaded, drained and ventilated
- ✓ PAS24 option available
- ✓ Timber only option available (not available PAS24)

Timber Aluminium Clad

Choices

Alu Clad timber windows and doors are manufactured from timber with an external aluminium cladding combining high levels of insulation and a low maintenance exterior finish

'Choices' Alu Clad Tilt and Turn

High performance inward opening, tilt & turn windows with an external aluminium cladding which provides a strong, durable external surface requiring minimal maintenance. This reduces future costs and improves the life expectancy of the product.

Specification

- ✓ Engineered (laminated) timber profiles
- ✓ Pine timber with external aluminium cladding
- ✓ Factory applied paint/clear lacquer/white tone lacquer options internally
- ✓ Tilt & turn, tilt only or turn only - all inward opening
- ✓ Circumferential fittings with tilt ventilation
- ✓ Factory fitted 24mm double glazing or 40mm triple glazing
- ✓ Internally beaded
- ✓ Overall U-value of (approx.) 1.2W/m²K - double glazed or 0.9W/m²K - triple glazed
- ✓ Shaped opening windows possible
- ✓ Durable external aluminium cladding
- ✓ PAS24 option available
- ✓ Timber only option available (not available PAS24)

Alu Clad Doors

The 'Choices' Alu Clad door range is a high performance door system which includes:

- ✓ Entrance Doors
- ✓ French Doors
- ✓ Sliding Doors

With such a vast range of different solutions, each offering their own unique design features, we can offer a tailored solution perfect for your project.

Choices 'Ultra4'

Modern glass technology allows glass to be used for so much more than something to look through. We have carried out tests on a wide range of our products, so we are able to advise whatever the requirement.

'Ultra4' The 'FOUR IN ONE' upgrade

Thermal Performance

'Ultra4' offers 'A' rated thermal performance

A special microscopic coating on the glass helps reflect heat back into the room offering savings of up to 22% on energy bills versus single glazing. With windows giving up to 26% of heat loss, choosing the right glass and windows, is an important step to making your home warmer.

Noise Control

'Ultra4' helps reduce external noise

Making our homes quieter by reducing unwanted noise from outside, is an undoubted benefit. 'Ultra4' reduces noise ingress by having a transparent sound absorbing layer, built into the glass. This makes it 20% better at reducing noise, than standard 'Choices' glass.

High Security

'Ultra4' offers greater security

A very strong transparent film is glued between two layers of glass for the outside skin of the sealed unit, making it much harder to break than standard glass. In the case of an incident, the glass will not shatter, but be held by the film insert.

Furniture Fade

'Ultra4' helps reduce colour fading

Fabrics on furniture, Curtains and Carpets fade when exposed to the sunlight. This is caused by the Ultra Violet rays from the sun. 'Ultra4' is designed to block 99.6% of these UV rays which cause such damage to your fabrics, thus allowing them to remain fresh looking and so longer lasting.

Glazing Enhancements

Choices

Offer a range of glazing enhancements to create modern and traditional looks with the addition of Georgian, Astragal or leadwork options.

Astragal Bars

Available in a range of colours. Externally and internally fitted giving an authentic look and feel to any window, door or conservatory.

Diamond Leadwork

Handcrafted in lead. Patterns available in diamond, rectangular Queen Anne and a variety of designs.

Internal Georgian Bars

Internally fitted bars available in 18 or 25mm. Various styles include single bars, curved hoops and grid pattern.

Square Leadwork

Handcrafted in lead to create grid or border patterns.

Obscure Glass

Different patterns to choose from with various levels of obscurity.

Repair Kit Accessories

For topping up kits there are a range of accessories to choose from.

Hardwax

Aerosols

Konig Repair Kits

Choices

Easily repair scratches, minor gouges and scuff marks on foiled or non foiled PVCU windows and doors.

The blemishes created are minor in themselves, but major when the perfect job is expected.

Konig UK has the answer in that its repair kits are ideal when a PVCU window or door has been damaged in transit, when being installed or even when a customer has damaged the product.

PVCU Window and Door Repair Kits

Window Doctor Repair Kit

The Window Doctor Kit is designed for installers and allows them to carry out simple "on-site" repairs to popular Renolit foils.

The Complete Window Repair Kit

The Complete Window Repair Kit is designed for service engineers to carry out cosmetic repairs reducing the need for expensive and time consuming remakes.

The kit contains repair products for White Extrusion, Golden Oak, Irish Oak and Rosewood Renolit foils.

Training Courses

The kits are supported by a range of excellent hands-on repair courses

These training courses are designed to ensure you to get the most out of the Konig product range. Held at the Konig "in-house" training centre in Coventry or training can be arranged to be held on-site at your premises. www.konig-uk.co.uk/training-courses
