Flush 100

The latest in innovative PVCU window design

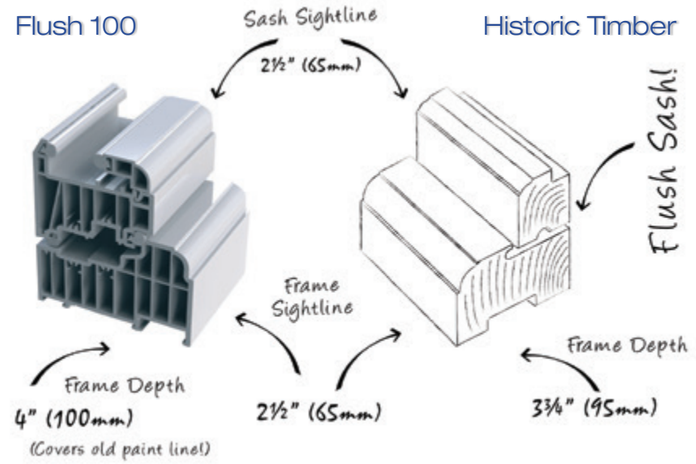
In old or new properties, Flush 100 provides the perfect solution.

With it's 100mm, 9 chamber profile and remarkable resemblance to timber or painted timber, coupled to exceptional thermal efficiency and security, the overall feel good and look good factor is ensured.

Flush 100, the real alternative to timber.

Looks and feels like timber, preserving kerbside appearance

Flush 100 is designed to authentically replicate the kerbside appearance of traditional timber windows. This is achieved by mirroring the sizes and external puttyline chamfer and decorative detailing.



The Flush Fitting Sashes are designed specifically to replicate 19th century timber windows.

The likeness to timber is accentuated by the arrissed joints mimicking traditional joinery and shows the attention to detail in the manufacture of Flush 100

The sashes have the option of having joints that look like quality joinery

Unlike most other PVCU systems the woodgrain or painted timber effect is sustained throughout the frame

Personalise with Colour

Rosewood	Golden Oak	Irish Oak	English Oak
Silver Oak	Schwarzbraun Black	White Ash	Cotswold Biscuit (Ivory)
Painswick Grey	Corse Lawn Grey	Chartwell Green	Clotted Cream
Eclectic Grey (Smooth finish)	Vintage Cream (Smooth non Foiled)	Dual Foil Options (Over 29 Combinations Available)	

Attention to detail

Flush 100 designed specifically with timber in mind

Flush fitting sashes and astragal grid

Hardware and performance

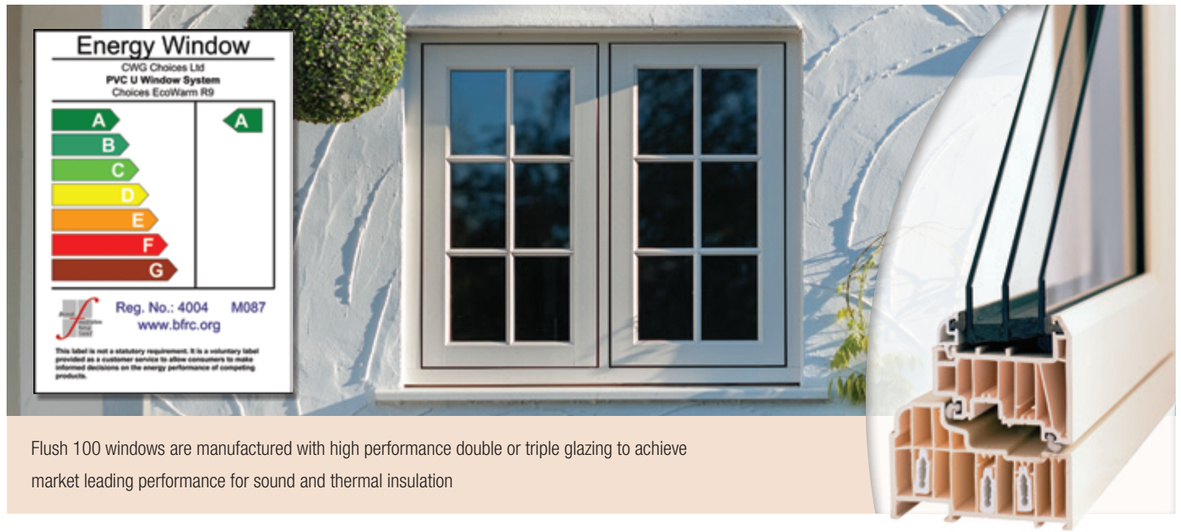
Flush 100 is available with a complete range of modern and traditional furniture and styling options to suit properties old and new

Flush 100

Functional retaining stay

Flush 100 includes the option of external and internal transom bars as often seen on timber windows

Authentic external putty line georgian bar details and optional butt hinges



Flush 100 windows are manufactured with high performance double or triple glazing to achieve market leading performance for sound and thermal insulation

Flush 70

The 70mm Flush Casement "Alternative to Timber" Window

Flush 70 combines modern performance with traditional styling offering authenticity without compromise.

The traditional appearance coupled with the 70mm frame depth and flush casement design, combine to offer a cost effective timber replacement.

UPVC Alternative to Timber Windows

The flush casement design is reminiscent of early 19th century timber windows and offer an authentic heritage look ideal for home owners in conservation areas.

Whilst 'Choices' Flush 70 may offer traditional design there is nothing traditional about the acoustic or thermal performance ensuring your home is warm and draft free.

Personalise your windows by choosing from a range of modern or traditional handle and georgian bar designs.

Legacy

NEW CONCEPT Traditional Idea

LEGACY - the alternative to timber due to it's authentic woodgrain finish.

With the 70mm, 5 chambered profile giving outstanding performance in terms of high thermal efficiency, high security and low maintenance (no more painting or staining) the perfect living environment is assured.

When you choose LEGACY, you are enhancing your property with style.

Authentic timber look with modern technology

Is it a timber window with a PVCU window board or is it a LEGACY window with a timber window board?

It is a LEGACY window with a timber window board, Timber and PVCU in harmony.

70mm frame depth provides compatibility when replacing most modern window systems

Seeing is believing

This could be traditional timber joinery, in fact it is LEGACY with arrissed joints and sculptured detail

LEGACY external chamfer finish with 154mm Slim Sash / Mullion / Sash Sightline designed to replicate the putty line detail of a timber window

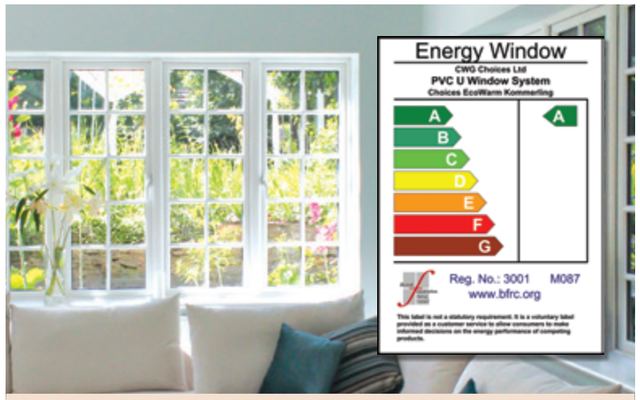
- Black/Brown
- White Ash Both sides Only

Available on smooth white only

- Chartwell Green
- Painswick Grey
- Anthracite Grey



LEGACY windows are manufactured with double or triple glazing to achieve better performance for sound and noise insulation

HERITAGE

VERTICAL

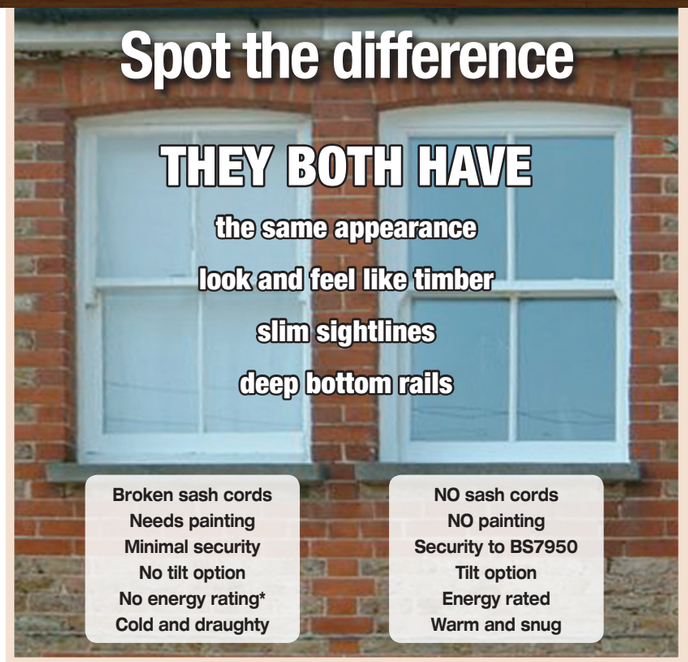
SLIDING SASH WINDOWS

Modern technology with “Heritage” in mind

Choices Heritage vertical sliding sash windows are energy efficient with high performance and security.

They are easy to slide open and with both panes tilting inwards, for ease of cleaning.

In any property, the authentic detailing of the sash horns, a deep bottom rail, slim interlock and traditional chamfer on the sashes make it is almost indistinguishable from a timber alternative, yet they provide all the inherent advantages of modern materials.



Tilting for cleaning

Alternative to Timber Doors

Period Style Entrance Doors

Choices "Alternative To Timber" door range, are traditional looking doors utilising the benefits of modern materials. Expertly handcrafted with mechanically jointed midrails and mullions to create an authentic wooden appearance.

There are many hardware alternatives available including the traditional AV2 Heritage lock, which removes the need for a modern external lever to operate the locking system.

The Flush Fitting Sashes

Optional Mechanical Joints

Flush 100

100mm Flush Sash Doors

Put simply 'Choices' Flush Fitted Doors are designed to replicate traditional timber doors with flush fitting sashes. With their authentic slimline appearance they offer the perfect match in design and colour to the Choices Flush Casement Window.

Choices flush fitted doors are available as open out single and double doors, with full height glass panels and optional traditional georgian bars.

PVCU “Imagine” Doors

Multifolding

‘Choices’ Multifolds are a new concept in PVCU folding doors, combining the rigidity of aluminium and the aesthetics of timber.

Its attention to detail in design, security and thermal performance all combine to make it a truly innovative way to transform any room. All door leaves fold flat to the inside or the outside of the opening providing maximum clear opening space.

The perfect addition to any home to help divide a room, open up onto a terrace or conservatory - or for simply enjoying panoramic views.

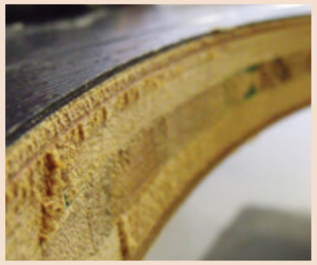
Single and Double

A stunning range of traditional looking open-in or open-out doors, their unique design means there is no requirement for a floating mullion on double doors. With flush fitting sashes on open out doors, improved appearance and slimmer sightlines are assured.

Traditional looks

Stable Door Option

Design Features



Solid Timber Core

Traditional Hardware

Composite Doors

Durability with modern technology

Choices’ Solidors look and feel just like natural wooden doors but offer all the benefits and security of a modern product. Available with optional side panels and there is also the option for a french door combination.

Each composite door is constructed with a solid timber core and a high security locking as standard, thus providing peace of mind for the security of your home - as well as being efficient at keeping out the cold and helping to drown out any excess noise from the outdoors.

Premidoor

A ‘sliding’ door of exceptional size

Premidoors provide vast unbroken sightlines for maximum viewing with high levels of security and weather performance, makes for an impressive entrance for any room, perfect for creating a secure barrier for that large opening, that demands unbroken sightlines.
