PVCU Windows and Doors

Modern • Traditional • Innovative

The *Choices* brand - the brand that allows you to let your imagination run wild

You may be looking for a 'MODERN' or 'TRADITIONAL' look for your house - it's all here.

Your choice may be for STANDARD white or foiled PVCU windows and matching doors. However, there are other choices with our 'ALTERNATIVE TO TIMBER' collection, or if you desire traditional wooden windows and doors, view our TIMBER range.

For the modern look, there is a full range of ALUMINIUM windows and doors with their neat and tidy slim frames, giving more glass area.

For doors, there are the usual single and double doors with a variety of designs, but also have a look at the sliding and folding doors, which can bring a new dimension to your home.

Last, but by no means least, there is the GLASS! Choice of patterns, colours and performance. In addition, you can consider glass that helps reduce noise, increases security, improves thermal performance and even reduces fade in carpets and furniture - it's all here.

The products are all shown in the following pages, and although the choice is stunning, there's one constant: high quality and high performance of every product.

Aluminium Windows and Doors

'Alternative to Timber'

Timber Range

PVCU WINDOWS

Windows with the widest choice

Choices standard PVCU range offers different styles and types of windows to suit you and your property.

Your windows can be made sculptured, bevelled or flush in systems that are totally compatible with *Choices* doors and conservatories.

Choices thermally efficient, low maintenance windows and doors are available in a wide range of colour finishes...

'Alternative to Timber' Collection

Flush 100

'Choices' Flush 100 'is specifically designed to replicate 19th century timber windows and doors with a flush external casement finish. Choose between two internal finishes, R9 with a decorative internal finish and R2 offering a square clean design.

Both are ideal when replacing 100mm traditional timber windows. With a choice of styling options they are ideal for period and modern properties and approved for use in conservation areas.

R9 has a traditional, decorative, internal finish

R2 with clean, square lines internally, ideal for modern interiors

Flush external finishes and external transom bar upgrade

20mm Astragal and 60mm Transom bar upgrade

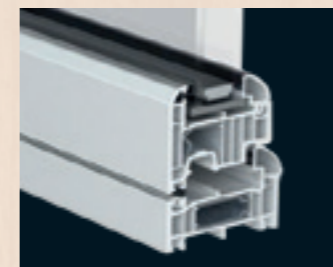

Flush 70

Flush 70 combines modern performance with traditional styling offering authenticity without compromise.

The traditional appearance coupled with the 70mm frame depth and flush casement design, combine to offer a cost effective alternative to timber.

Designed to look just like traditional timber windows makes them suitable for conservation areas.

6 chambered sash for high thermal efficiency

Flush fitting sashes

Legacy

70mm LEGACY Storm Casement windows offer the best of both worlds – they look and feel just like timber but have all the benefits of modern technology.

Legacy are an ideal cost effective solution when windows need replacing.

External putty line chamber finish with 154mm slim sash

Arched joints mimic traditional timber joinery

Flush 75

'Choices' 'Flush 75' offers the same great external finish as 'Flush 100', but has been designed with a flush finish internally and are ideal when replacing 70mm modern systems.

Flush external finishes with equal sightlines

Flush internal finishes with decorative detailing

External transom bar upgrade

20mm Astragal and 60mm Transom bar upgrade

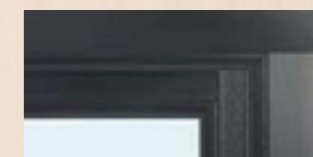

Vertical SLIDING SASH WINDOWS

Choices Imagine vertical sliding sash windows offer exceptional performance, utilising modern technology whilst maintaining authentic looks.

They are easy to slide open and with both panes tilting inwards, makes cleaning the outer sides easy.

Secured by Design*
See window standards below

Choices provides exceptional quality as standard

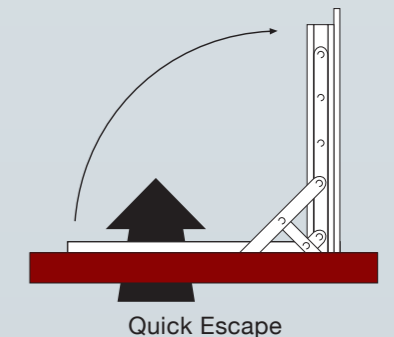

French Windows are excitingly different and certainly contemporary, yet with classical good looks. Both sides open fully leaving a clear, unobstructed opening. This gives an easy escape route should there ever be an emergency.

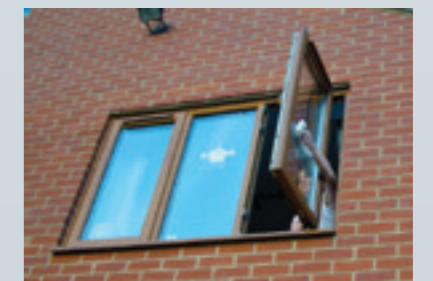

Tilt and Turn windows have built in versatility. Turn the handle and the window tilts inwards for ventilation.

Turn the handle further and the window hinges inwards for ease of cleaning and escape should there be an emergency.

Escape/easy clean hinges provide an escape route and the facility to clean the exterior from the safety of the room.

Quick Escape

Easy Clean

Ventilation

If working under the strictures of 'Building Regulations' ie New Build including extensions, then Rapid Ventilation must be incorporated. This means that the 'clear area' created by open windows must not be less than one twentieth of the floor area. Again, in 'New Build, situations 'background ventilation' must be incorporated – usually by 'trickle vents'.

Child Safety

With *Choices* you have the option of an effective window safety device that cannot be disengaged accidentally

Structural Integrity

Choices products are expertly crafted, combined with the most advanced technology and designs

Impact resistant, multi-chamber PVCU profiles are engineered for strength and where appropriate, are reinforced with galvanised steel.

You can be confident in every application whether it's a custom built conservatory or a super strong jacking system for bay windows and coupled frames.

Double or triple glazing

Aluminium bay connector

Weather seals

Multi-chamber high impact PVCU for additional strength and thermal performance

Standards

Choices believe in working to not only high standards – but measurable high standards

To this end, *Choices* takes its accreditation in management and manufacturing very seriously. This ensures that you are getting a product with proven performance at whatever level.

Upgrade to PAS 24 / Secured by Design*

Secured by Design can sometimes require one laminate skin, this decision is made by the client and the police advisor.

Choices takes glass seriously

Many think that glass is just for looking through - it is - but also for much much more!

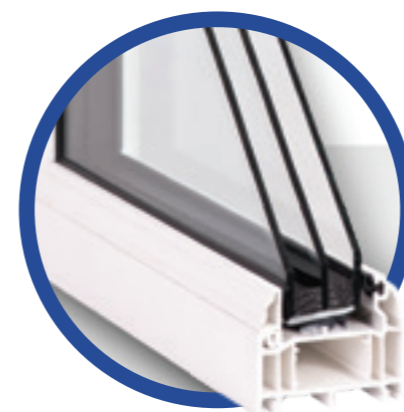

Choices products are energy efficient

The benefit of choosing the Choices range of windows is the high specification glazing that comes with them.

Choices use high standard glazing in all their windows and doors and all Choices 70mm PVCU standard windows are 'A' Energy Rated as standard.

Choices deliver the highest possible window energy ratings. By using Choices you are able to minimise heat loss and so help reduce your heating bills. You will have peace of mind knowing that you have glazing of the highest performance virtually eliminating condensation and draughts.

Triple glazing for enhanced energy saving

To further minimise the heat loss through your glass, there is 'triple glazing'. This means reduced heat loss and less heat input, so reduced heating bills.

Your 'feel good' factor is enhanced in that you know you are doing all you can to reduce your carbon footprint, so helping save the planet.

ComfortClear

'Ultra4' upgrade to a quieter, safer and more habitable home

Thermal Performance Glazing

'Ultra4' offers the same great thermal performance as Choices high specification 'A' rated windows.

A special microscopic coating on the glass helps to reflect heat back into your room offering savings of up to 22% on energy bills versus single glazing.

With up to 26% of all heat from homes being lost through the windows, choosing the right windows and glass is an easy way to make your home warmer.

Noise Control Glazing

Making our homes free from unwanted noise is important for all of us. 'Ultra4' is specially designed with a transparent sound absorbing layer built into the glass and is 20% better than Choices standard glazing at reducing sound.

Upgrading to 'Ultra4' will reduce the noise heard from cars, neighbours, planes and many other things that bring unwanted noise into your home.

High Security Glazing

A safe home is critical, upgrading to 'Ultra4' will provide you with peace of mind and make your home more secure.

A very strong transparent film is glued between two layers of thin glass making it much harder to break than Choices standard glass. If there is an accident the film holds any broken glass in place and avoids it shattering on the floor.

Furniture Fade Protection

How many times have you seen your furniture fade from years of exposure to the sun. This is a result of the UV light from the sun which will fade carpets, sofas and curtains. Reducing the effects of these UV rays helps your carpets & furniture stay looking new for longer.

Upgrading to 'Ultra4' will block 99.6% of the UV rays that fade furniture.

Decorative Glazing - Enhance the look

Hardware

Astragal Bars

Available in all colours. Externally and internally fitted on the surface of the glass, giving an authentic look and feel to any window, door or conservatory.

Part M Compliant
Mobility Access

Ultion Plus cylinders are available to fit to any new 'Choices' single, double or bi-fold door and can be retrofitted to existing 'Choices' doors

The basis of the high security is the Molybdenum Alloy Core (Centre section) which as soon as the lock comes under attack, goes into 'Lockdown Mode'. The first two sections are designed to 'snap' off – then the attacker will be confronted with the high security 'core'.

- Features and Benefits**
- ✓ Eleven Pin Locking
 - ✓ 294,970 Lock Combinations
 - ✓ 100,000 Cycle Endurance Test
 - ✓ Snap Tested Resistant Sections
 - ✓ Drilling, Pick and Bump Tested
 - ✓ Molybdenum Alloy Core
 - ✓ Available on any new 'Choices' door
 - ✓ All Locks can have the same key
 - ✓ Single, Double, Sliding and Bi Folding
 - ✓ Retro Fit into existing doors

Make the most of the room with a view to enjoy all year round

PVCU Range

Bi-Folding Doors

Choices PVCU Bi-folds combining the rigidity of aluminium and the aesthetics of timber.

Its attention to detail in design, security and thermal performance all combine to make it a truly innovative way to transform any room. All door leaves fold flat to the inside or the outside of the opening providing maximum clear opening space.

The perfect addition to any home to help divide a room, open up onto a terrace or conservatory - or for simply enjoying panoramic views.

Premiline PVCU Patio Doors with smooth sliding operation and stylish looks

The *Choices* Premiline Sliding Patio door is available in 2, 3 or 4 pane configurations.

ALUMINIUM Range

Bi-Folding Doors

Choices Aluminium Bi-folding doors create flexible and modern living spaces, whether you want to use them internally or externally.

Our bespoke designs perfectly match the existing style of your home, allowing natural light to flood in whilst providing the opportunity to bring the outdoors, indoors.

Choices Cornerless Bi-folding Doors offer the ultimate uninterrupted view, inside and outside of any room.

Patio Doors

The Aluminium sliding door is a multi-configuration in-line system that allows you to specify and design the most suitable solution for your project.

The system is available with fixed lights or sliding doors, as well as double and triple track options. Outstanding thermal performance and the highest quality fittings ensure reliable and comfortable operation.

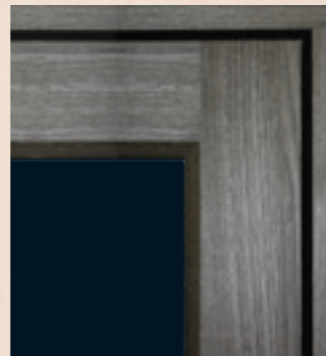

'Alternative to Timber' Doors

Residence Collection

Flush Sash Doors

Put simply *Choices* Flush doors are designed to replicate traditional timber doors with flush fitting sashes. With their authentic slimline appearance they offer the perfect match in design and colour to the *Choices* Flush Casement window range.

Available as open-in or open-out (for flush out) single and double doors. Options include low aluminium threshold, full height glass panels and traditional georgian bars. With handles to both leaves on double doors, *Choices* Flush doors will be a welcome addition to any home.

Flush Fitting Sashes

Optional Mechanical Joints

'Alternative to Timber' Doors

Period Style Doors

Choices 'Alternative To Timber' doors are traditional looking doors manufactured utilising modern materials and techniques to look like timber.

Available as single and double doors, they are expertly handcrafted with mechanically jointed midrails and mullions to create authentic timber appearances.

Solidor.

Residor.

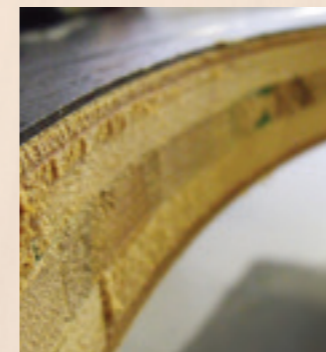

Composite Doors

Durability with modern technology

Choices Solidors look and feel just like natural wooden doors but offer all the benefits and security of a modern product. Available with optional side panels and there is also the option for a french door combination.

Each composite door is constructed with a solid timber core and a high security locking as standard, thus providing peace of mind for the security of your home.
